Typical Specification KORO-TRANS™ PebbleTread-N_M™

Step treads shall be manufactured to OEM color and dimensional specifications using abrasion resistant Koro-Trans thermoplastic compounds in an offset raised pebble pattern. Nominal pebble dimensions shall be: 0.250" diameter and 0.125" in height. Nominal pebble spacing shall be 0.680" center to center. The pebble pattern shall be in rows, with each row offset 0.340" from the preceding row. Step Treads shall have an integral bright white nosing with an impact resistant rigid polymer wear-guard on the leading edge. Tread and nosing shall be fused forming a seamless joint and shall be permanently bonded to non-metallic Koro-Trans polymer step backing. The step tread shall be certified by the manufacturer to meet the above specifications and to have completed 24-months of in-service testing without a failure.

Color Options

PebbleTread is available in industry-standard colors: Black, Blue, Grey, Green, Light Grey, Mahogany, and Tan. PebbleTread is ideal for retrofit or new vehicle installation.

Design Flexibility

With the KORO-TRANS™ fabrication process, step treads can be manufactured in any size or configuration without the need for costly tooling.
